Location: Madrid, Spain
Email: daniel.precioso@ie.edu
ORCID: 0000-0003-3836-1429

Research Profile

Computational scientist working on optimization and modeling for physical and climate systems: variational and optimal-control methods for maritime weather routing, scientific machine learning for physical models, and statistical models of climate risk. Postdoctoral researcher and adjunct professor at IE University since 2023. 141 citations and h-index 6 on Google Scholar (October 2026).

Academic Positions

Postdoctoral Researcher & Adjunct Professor — Sep 2023 – Present
IE School of Science and Technology, IE University — *Madrid & Segovia, Spain*

- Member of the IE Research Datalab and the IE Insurance and Tech Lab.

Predoctoral Researcher — Sep 2019 – Aug 2022
University of Cádiz — *Cádiz, Spain*

Visiting Researcher (intermittent stays) — 2022 – 2024
Dept. of Mathematics and Statistics, Dalhousie University (host: Prof. R. Milson) — *Halifax, Canada*

- 10 Jul – 12 Oct 2022, 28 Jul – 28 Aug 2023 and 12 Apr – 7 May 2024, working on maritime weather routing.

Other Positions

COO (technical contributor) — Apr 2023 – Present
Canonical Green, maritime routing software — *Madrid, Spain*

Data Scientist — Sep 2022 – Apr 2023
Komorebi AI — *Madrid, Spain*

Junior Data Scientist — Jan 2019 – Jun 2019
Foqum — *Madrid, Spain*

Education

PhD in Computer Engineering (Cum Laude) — Sep 2019 – Jul 2023
University of Cádiz — *Cádiz, Spain*

- Thesis: *Applications of Machine Learning and Data Science to the Blue Economy*.

MSc in Statistical and Computational Information Processing — Sep 2018 – Jul 2019
Universidad Politécnica de Madrid — *Madrid, Spain*

Degree in Physics — Sep 2014 – Jul 2018
Complutense University of Madrid — *Madrid, Spain*

Accreditations

- ANECA (Spain), positive evaluation for *Profesor Contratado Doctor* (PCD) and *Profesor de Universidad Privada* (PUP), October 2026.

Research Funding

KAN4Met: Kolmogorov–Arnold Networks with applications in weather forecasting — Jul 2025 – Present
Agencia Estatal de Investigación, PID2024-155187OB-I00 — *Team member*

- PI: D. Gómez-Ullate. Implementing Kolmogorov–Arnold Networks for weather forecasting and its use in maritime routing.

Climate Change Effects on Life and Health Insurance — 2025 – Present
IE Insurance and Tech Lab × Vienna Insurance Group (industry contract) — *Lead of Phase 2*

- Phase 1 (2025/26), research team member: climate and mortality, with distributed lag non-linear models and climate-adjusted life tables.
- Phase 2 (2026/27), lead: EU rollout, model extensions and scientific publication. Approved by the VIG board in May 2026.

Green Navigation: maritime weather routing Dec 2023 – Mar 2026
Missions València 2030 innovation grant (Canonical Green) *COO / project presenter*

- **EUR 93,362.84** awarded; ranked first by the evaluation jury. Execution period extended by 9 months in May 2025.

Weather Navigation Dec 2022 – Nov 2024
Agencia Estatal de Investigación (TED 2021), TED2021-129455B-I00 *Team member*

- *Optimization of maritime routes with real-time oceanographic and meteorological data*. **EUR 101,200** (direct costs). PI: D. Gómez-Ullate. Optimization algorithms for weather routing; main editor of weathernavigation.com.

Smart Shipping Sep 2022 – Jun 2025
BBVA Foundation, Research Projects in Mathematics 2021 *Team member*

- *Mathematical optimization for a more efficient, safer and decarbonized maritime transport* (IE University and University of Cádiz). PI: D. Gómez-Ullate. Evolutionary, graph-based and variational algorithms for ship weather routing.

Publications

- **D. Precioso**, F. J. Suárez Pedraza, S. Lloyd, C. Boado-Penas, D. Gómez-Ullate. Incorporating Temperature-Dependent Mortality into Projected Life Tables. IE University working paper (open access), v1.0, March 2026.
- **D. Precioso**, F. Suárez, J. Jiménez de la Jara, R. Ballester-Ripoll, D. Gómez-Ullate. BERS: Locally Optimal Continuous Algorithm for Maritime Weather Routing with Just-in-Time Arrival. arXiv:2605.31533, 2026. *Under review at Ocean Engineering (second round, minor revision).*
- M. Marcos-Pérez, J. Jiménez de la Jara, **D. Precioso**, A. Muñoz, M. V. Redondo-Neble, D. Gómez-Ullate. New analysis in the preliminary design for LNG and LPG ships. *Marine Structures* 104, 2025 (Q1).
- J. Jiménez de la Jara, **D. Precioso**, L. Bu, M. V. Redondo-Neble, R. Milson, R. Ballester-Ripoll, D. Gómez-Ullate. HADAD: Hexagonal A-Star with Differential Algorithm Designed for weather routing. *Ocean Engineering* 319, 120050, 2025 (Q1).
- **D. Precioso**, R. Milson, L. Bu, Y. Menchions, D. Gómez-Ullate. Hybrid search method for Zermelo's navigation problem. *Computational and Applied Mathematics* 43, 250, 2024 (Q2).
- M. Navarro-García, **D. Precioso**, K. Gavira-O'Neill, A. Torres-Barrán, D. Gordo, V. Gallego, D. Gómez-Ullate. Aggregation dynamics of tropical tunas around drifting floating objects based on large-scale echo-sounder data. *Marine Ecology Progress Series* 715, 129–143, 2023 (Q1).
- I. Barbeito, **D. Precioso**, M. J. Sierra, S. Vegas-Azcárate, S. Fernández Balbuena, B. Vitoriano, D. Gómez-Ullate, R. Cao, S. Monge, and the Study Group for Non-Pharmaceutical Interventions in Spain. Effectiveness of non-pharmaceutical interventions in nine fields of activity to decrease SARS-CoV-2 transmission (Spain, September 2020 – May 2021). *Frontiers in Public Health* 11, 2023 (Q1).

NeoCam: An edge-cloud platform for non-invasive real-time monitoring in neonatal intensive care units. *IEEE Journal of Biomedical and Health Informatics* 27(6), 2614–2624, 2023 (Q1).
- **D. Precioso**, M. Navarro-García, K. Gavira-O'Neill, A. Torres-Barrán, D. Gordo, V. Gallego, D. Gómez-Ullate. TUN-AI: Tuna biomass estimation with Machine Learning models trained on oceanography and echosounder FAD data. *Fisheries Research* 250, 2022 (Q2).

Patents and Open Resources

- **NeoCam**, non-invasive neonatal monitoring system. Utility model, Spain, 2023. Co-inventor.
- **Weather Routing Benchmark** (weatherrouting.org), created with RISE, the Research Institutes of Sweden: the first open benchmark for maritime weather routing.
- Its first edition, in 2026, had eight participating teams.

Teaching (IE University)

Computer Programming I 2023 – Present
Bachelor in Applied Mathematics

- Student evaluations (overall / professor): 2025/26 4.73 / 4.87 (15 of 25 responses); 2024/25 4.25 / 4.31 (16 of 26); 2023/24 4.33 / 4.21 (14 of 15).

Applied Math Lab 2024 – Present
Bachelor in Applied Mathematics

Coding Lab 2024/25
Bachelor in Applied Mathematics

- Student evaluation 2024/25: 4.25/5 overall; 4.40/5 professor (5 of 13 responses).

Time Series Analysis 2024/25
Bachelor in Philosophy, Politics, Law and Economics + Business Administration (PPLE-DBA)

- Student evaluation 2024/25: 4.73/5 overall; 4.80/5 professor (5 of 8 responses).

- Public course materials: Python Course and Applied Math Lab.

Supervision

- Master's thesis, co-director: *Técnicas de interpolación de campo magnético con Machine Learning en observatorios espaciales de ondas gravitatorias.* University of Cádiz, Research Master in Systems and Computing Engineering. Defended 16 December 2024, grade Sobresaliente.
- Bachelor's Capstone projects, IE University: 2 students, Sep 2026 – Jul 2027 (in progress).
- Mentor in IE Sustainability Datathons and hackathons.

Awards and Recognition

- Missions València 2030: EUR 93,362.84, ranked first by the jury (2023).
- Pitched Green Navigation at the European Parliament through The Arch programme (2023).
- Prototypes for Humanity, Dubai (2024): selected among 100 innovations from more than 2,000 submissions.
- 2nd prize, OpenCV AI Competition 2021 (NeoCam), among more than 1,400 teams.

Talks and Service

- Organizing committee, Climate Change and Insurance Conference 2026 (CCI26), IE University, Segovia and Madrid, 2–4 September 2026.
- Created the Weather Routing Benchmark with RISE and presented BERS, SWOPP3 workshop, RISE/SSPA, Gothenburg, June 2026.
- Presentations to the VIG steering committee (2025–2026) and to the VIG board, Vienna (May 2026).
- Talk, Climate Change and Insurance 2025, ICMS, Edinburgh.
- Guest on *The Conversation Weekly* (2025) on maritime decarbonization.
- Editor and designer of the IE Research Datalab website.

Skills and Languages

Programming : Python (expert), R, MATLAB, SQL
Scientific ML : PyTorch, JAX, TensorFlow, scikit-learn
Tools : LaTeX, Git and CI/CD, Flask
Languages : Spanish (native), English (C1)
